BMW M3

Many owners know that, under extreme conditions such as those achievable at the track, the limits of the standard BMW M3 brakes can be exceeded, sometimes resulting in a substantial deterioration in brake performance.

UPGRADE?

Alcon's BMW M3 SuperKit front & rear brake package offers a range of benefits to improve your braking performance.

DISC & BELL ASSEMBLY

384x34mm front disc and **370x30mm rear disc** offering significant **improvements in available brake torque**

Alcon assembly **lighter** than OE assembly - **reduced inertia**

Increased thermal capacity

Features Alcon **bespoke floating** drive system

Utilises Alcon's **unique Turbulator casting** for **maximum cooling efficiency**

Alcon crescent groove pattern allows for **improved gas release, increased initial bite & improved durability**

Rear disc and bell assembly **incorporates OE "drum in hat" handbrake configuration**

CALIPERS

Front caliper is a **6 piston monobloc** machined from a **single piece forging**; **Rear caliper** is a **4 piston monobloc** which combined offers a **more positive, responsive pedal** as a result of **improved caliper and system stiffness**

Increased pad area and volume offers **better temperature management** and **improved brake efficiency**

Pagid RS9-2 high performance road friction material offers **maximum performance** over a **wider temperature range**

Piston position designed to offer most **even pad wear**

Caliper specification designed to **improve overall system efficiency** whilst **maintaining the original balance and OE actuation**

PRICE LIST

| Part Number | Description | Retail |
|-------------|---|--|
| BKC8759D07 | BMW M3 SuperKit Front & Rear Package | For pricing details please contact your local Alcon dealer |
| BKC8759D09 | Non-M3 SuperKit (BMW E90 335i) Front & Rear Package | |
